

Beautiful!

Quote:

"If every job could be done like this with no hassles it would be great. Clean job and very good job. Hasn't spoilt the back of the house. Very pleased and happy with the job. Has stopped the rain coming under the doors which was the main problem".

Brief:

The client was in need of some shelter to stop the winter rain from flooding her outdoor area. The outdoor living area was tiled and did not allow any water to drain through. We decided on the Cantaport KCR 5130, but required to be cut the length to accommodate the curved parapet wall. Overall the location was very challenging to accommodate.

Before!
