As a carport, the cantilever is one of the most practical applications. Some applications have instances where access is tight and having 4 posts would simply make it impossible. With a Cantaport cantilever structure, that problem is reduced.

Maneuvering a Car under the Cantaport makes the task much easier. The location of the two posts, also allows enough clearance for the car doors to open.

The polycarbonate roof sheets reduce the heat by 83% and block out the UV rays by 99%. Resulting in a protected and cooler vehicle. Built-in gutters and rainwater downpipes ensure an efficient fuss-free structure.

Architecturally designed structure featuring an anodised aluminium frame ensures corrosion free, Termite free Long Lasting Shading Choice.

Cantaport shade structures can also be configured to adapt multiple vehicle shade covers. The Cantaport single basic unit can be configured as an inline, multiple units in a line, Y-Connection for two vehicles or M-Connection, wide beam for 2 to 3 vehicles cover.

Modern designed conventional carports are also available in various models and sizes. Cantaport is a unique product manufactured in Japan and certified to Australian Standards.
