## shade

the perfect pool shade accessory

cantaport

pool shade - spa covers - shading systems - made in Japan

When you install a Cantaport over your swimming pool you transform your pool area into a modern looking and pleasant space with a lot of style and contemporary ambience. The Cantaport provides sun protection over the pool using a single support on one side.

According to the Cancer Council Australia, shade is one of the most effective forms of sun protection. Cantaport structures can reduce exposure to UV rays by up to 99%, including ambient UV light in and around poolside areas. Pool users are considering Pool shade becoming a priority. Whether it's from concern over UV exposure, a need to find some shade from the hot midday sun, or simply to avoid a sunburn, many pool owners are turning to shade solutions for their pools.

Your cantilever structure reduces the heat by 83% to improve your comfort levels & allows filtered light to illuminate under the Cantaport roof. Architecturally designed structure featuring an anodised aluminium frame ensures corrosion free, Termite free Long Lasting Shading Choice.

If shading over the pool is not an option but still want a shade from the sun, Cantaport is the perfect option. You can place one of these freestanding Cantaport structures adjacent to a pool, placing lounge chairs and other outdoor furniture in it to create a relaxing enclave. Enjoy as much sun as you like on the water, then retreat to this comfortable and shady spot to enjoy, relax with family and friends.
